

# Convert to CMYK Using InDesign Export

InDesign's Export to PDF option can be used to convert all content to CMYK in the final PDF.

**Color** settings are located in the **Export Adobe PDF** dialog box under the **Output** tab.

- For **Color Conversion**: select **Convert to Destination (Preserve Numbers)**.
- **Destination**: settings for coated paper stocks should be set to the **Coated GRACoL 2006** profile as shown. Uncoated paper stocks should use the **Uncoated FOGRA29** profile.
- For the **Profile Inclusion Policy**: select **Don't Include Profiles**.
